## PREAMBLE:

The year 2018 has witnessed a rise in the number and seriousness of attacks against female and male journalists, and media freedoms in Palestine, compared to the previous year. The increase in the number and seriousness of the Israeli attacks has culminated in the killing of two Palestinian journalists by the Israeli occupation army snipers, namely (Yasser Abdelrahman Murtaja 30 years old, and Ahmad Abu Hussein 24 years old). This is in addition to the injuries of dozens by live bullets, explosive bullets, and gas bombs, directly fired at them in the course of their work which resulted in serious injuries.

During 2018, MADA-the Palestinian Center for Development & Media Freedoms has documented and monitored a total of 584 attacks committed against media freedoms in Palestine, 455 of which are committed by the Israeli occupation (accounted for 78%), while 129 are committed by various Palestinian authorities, in the West Bank and Gaza Strip, accounted for 22% out of the attacks during 2018.

### Violations against media freedoms in Palestine during 2018 according to the party that committed the violation

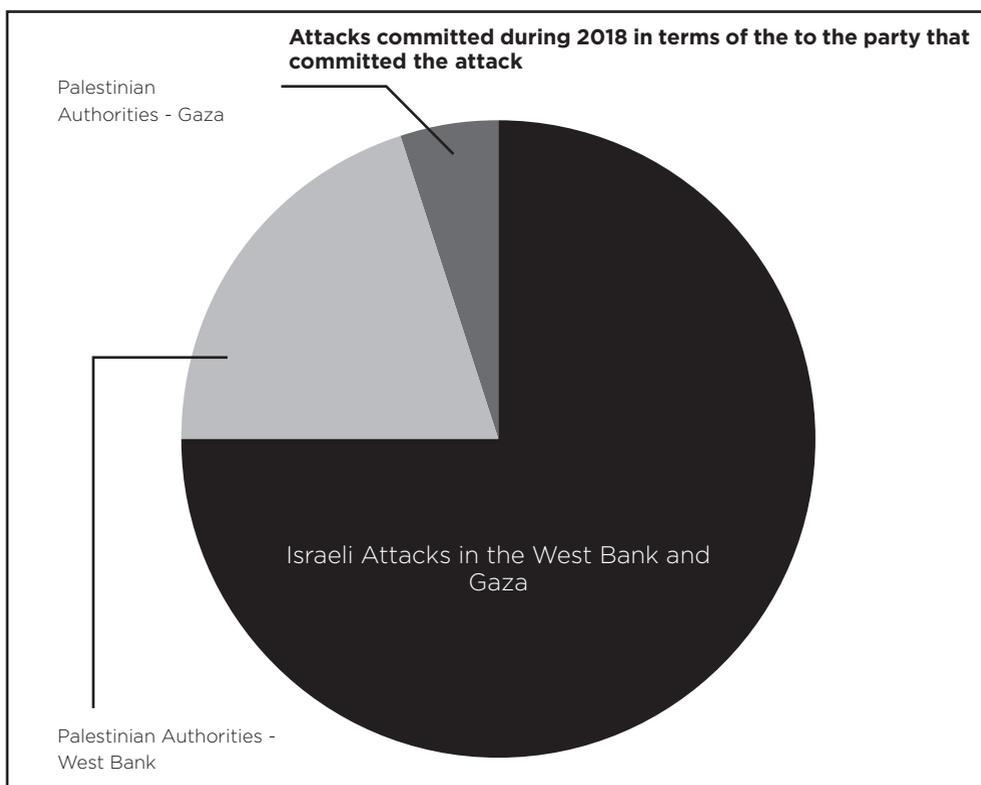

Party	Israeli Occupation	Palestinian authorities - West Bank	Palestinian authorities - Gaza Strip	Total
Number	455	88	41	584

The total number of attacks in 2018 has increased by a total of 54 attacks compared to the overall Israeli and Palestinian attacks during the past year, 2017. In other words, this increase in percentage terms accounts for more than 10%, even though in 2017 an increase by 38% was monitored compared to 2016. This means that in just two years, (2017 and 2018), a total increase in the number of attacks against media freedoms in Palestine exceeding 52% was witnessed. This period has also witnessed serious levels of violence in the suppression of media freedoms by the Israeli occupation.

A reading of the total figures during the past 10 years (including last year 2018) has showed that an average of 30 attacks against media freedoms are monitored each month in Palestine throughout this period<sup>1</sup>. However, the rate of attacks in the year 2018 alone exceeded 48 attacks during each month; that is, an increase by 60% out of the general average during the last decade.

Having viewed the Israeli and Palestinian attacks separately in terms of the rate of their occurrence, it was found that an average of 21 Israeli attacks were monitored every month over the past ten years, but the rate has risen in the past year 2018 alone to about 38 Israeli attacks every month. As for the Palestinian attacks, its average number during the past 10 years amounted to 9.4 per month. During the past year 2018, the number of Palestinian attacks against media freedoms has relatively and limitedly increased to 10.7 attacks each month.

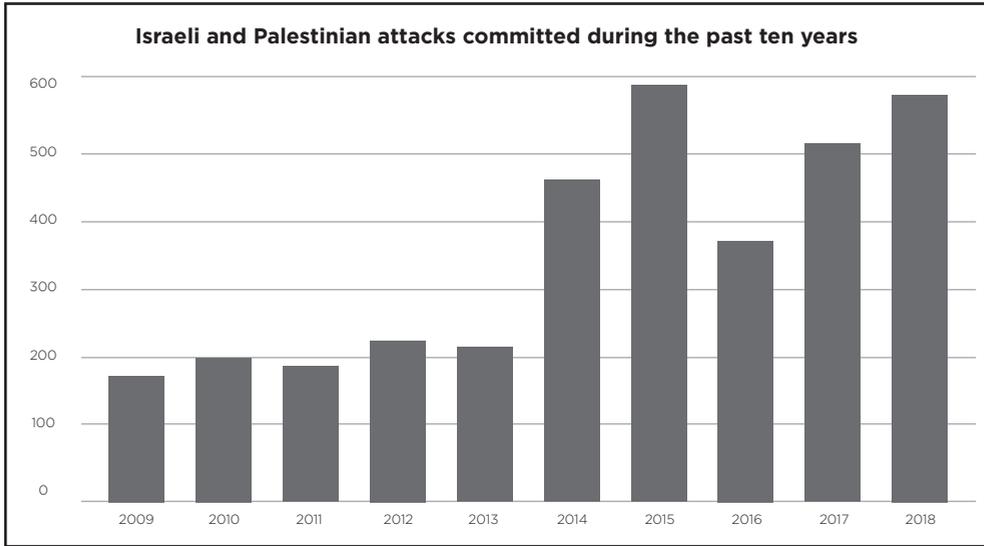

<sup>1</sup> This includes both Israeli and Palestinian attacks.

In other words, female/male journalists and media outlets in Palestine were, over the past year 2018, exposed to an average of 1.6 attacks per day or more than 3 attacks every two days.

## ISRAELI VIOLATIONS

Israeli attacks continued to escalate, in terms of quantity and seriousness. During 2018, the Israeli attacks have risen by a total of 79 attacks compared to the year 2017 by a rate of 21%. The year 2017 has witnessed a high record by 51% compared to 2016.

It is worth mentioning that if 2016 was more like a measurement year, the year 2018 has witnessed an increase in Israeli attacks against media freedoms in Palestine, amounted to 83%, compared to 2016. This shows part of the picture of the situation in which journalists and media agencies in Palestine are involved not to mention the challenges and risks posed to their lives, safety and ability to do their jobs.

### ► The Most Serious Attacks:

The Israeli attacks fall within 15 categories (in addition to another varied set of attacks classified and included together under “other attacks”). However, the most serious attacks which have affected female/male journalists and media outlets in Palestine (among the fifteen categories previously mentioned) fall under seven categories, namely: the murder of journalists which have affected two of the Palestinian journalists, physical injuries, arrest and detention, destruction or closure of headquarters, confiscation, or seizure or damaging equipment.

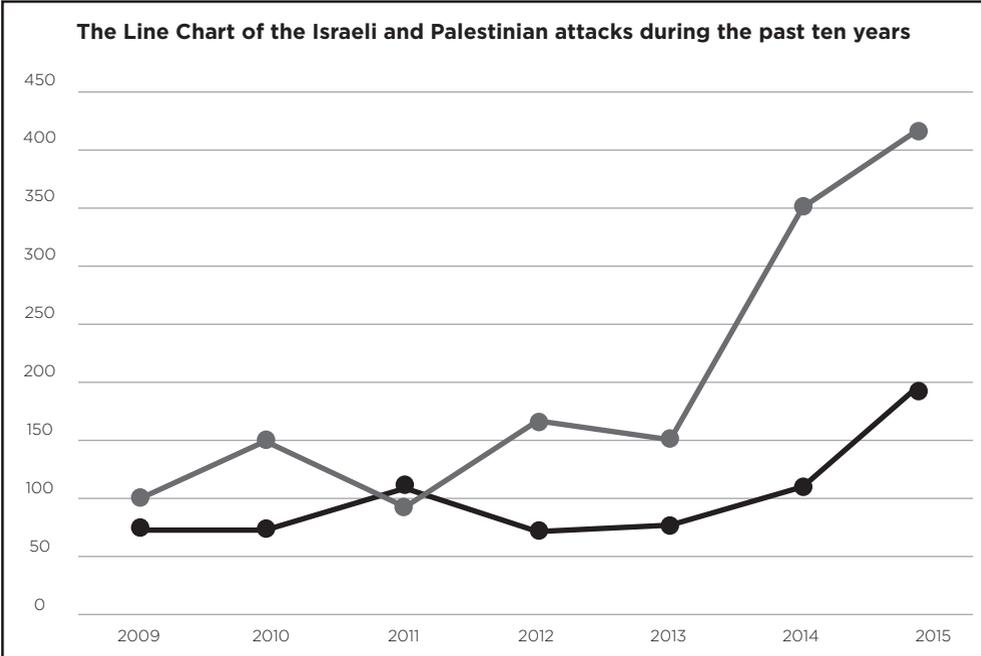

The seven categories of most serious attacks previously mentioned included a total of 346 out of the total Israeli attacks amounted to 455, equivalent

to 76% of the total attacks committed by Israeli occupation forces against media freedoms in Palestine in 2018.

**The Killing of Journalists:**

There is no doubt that the killing of the two journalists, Yasser Abdelrahman Murtaja (30 years old), and Ahmad “Mohammad Ashraf” Hassan Abu Hussein (24 years old), by the Israeli occupation snipers, while they were covering the peaceful return marches in Gaza Strip, with no more than one week between each<sup>2</sup>, are not only the most cruel and serious offences committed against media freedoms in Palestine, but they also clearly reveal the limitless cruelty of the Israeli Occupation forces towards female/male journalists and media outlets.

One of the Israeli occupation army snipers, on 6th April 2018, have shot the photojournalist of “Ain Media”, Yasser Abdelrahman Murtaja (while he was covering the events of the return peaceful march in Khuza’a, east of Gaza). It should be noted that at the moment he was shot and injured, he was at a distance of 350 meters away from the separating fence on the other side of which the Israeli soldiers were deployed according to the data collected by MADA field researcher from an eye-witness who was accompanying the

<sup>2</sup> The journalist Yasser Murtaja, was injured on 6<sup>th</sup> April 2018 by an explosive gunshot. Few hours following his injury (on the same day) he died, while the journalist, Ahmad Abu Hussein, was injured on 13<sup>th</sup> April 2018 (one week after Murtaja’s death) by an explosive gunshoy as well. However, (Abu Hussein) died on 26<sup>th</sup> April 2018, ten days after his injury as the doctors could not save his life.

journalist, Murtaja. His coworker, Hussam Hisham Salem (29 years old), who works for the same agency, reported to MADA “On Friday, corresponding 6th April 2018, we went to Khuza’a, southern Gaza, specifically, to Al-Awda Camp, to cover the events of the second-Friday return peaceful march, and we filmed the prayers there. Upon the completion of prayer, the demonstrators set fire to tires, and Yasser was filming the events, while standing behind the demonstrators. He wear the Press shield(vest) and helmet, 350 meters away from the border fence (where the Israeli soldiers and snipers were deployed). The soldiers started firing metal bullets at the demonstrators which resulted in the injury of one of them at first, and then the injury of Yasser by an explosive bullet of an Israeli sniper injuring his left flank through his right flank causing shattering inside his abdomen”. As soon as he was wounded, Murtaja was transferred to Nasser Hospital in Khan Younis, where he was admitted to the Intensive Care Unit and then to the operating room where he underwent a 4-hour operation during which part of the liver was removed. It was found that the bullet caused damage to the spleen and rupture to some arteries. He lost a lot of blood which is why the doctors gave him 16 blood units. After the operation, he was taken back to the ICU where he was supposed to remain under observation for 24 hours. At around 12:00 at night (ten hours after his injury), his health situation worsened, forcing doctors to bring him back into the operating room, and after an hour under the operations, he was announced dead.

On the following Friday, corresponding 13th April 2018, only one week later, in a similar scenario, an Israeli sniper fired an explosive bullet at the freelance

journalist of “Sawt AL-Shaab” Radio, Ahmad “Mohammad Ashraf” Hassan Abu Hussein, (24 years old) while he was covering the events of the return peaceful march in Abu Safiya, east of Jabalia, Gaza Strip, resulting in his death 12 days after his injury despite the several attempts of doctors to save his life.

According to the field investigations conducted by MADA researcher, and the information collected by an eye-witnesses, at around 2:15PM, on Friday, corresponding 13th April 2018, the journalist, Ahmad Abu Hussein was injured by an explosive gunshot in the left side of his abdomen, fired at him by one of the Israeli occupation soldiers while he was doing his work in Al-Awda Camp, east of Abu Safiya, east of Jabalia Refugee Camp, north Gaza Strip. It should be noted that he was wearing his Press uniform (a helmet marked TV, a blue vest marked Press), and he was standing in Jakar street, 300 meters away from the border fence (where the Israeli soldiers and snipers were deployed). According to the eye-witnesses (Thaer Fadel Ahmad Al-Zaanen, Nour Al-Deen Abdelsater, and Ramadan Al-Kurdi), Abu Hussein, on Friday, corresponding 13th April 2018, at 8:00AM, was filming the peaceful demonstrators. He waited in the journalists’ tent until 2:00PM, and when the number of demonstrators started to increase in parallel with the heavy firing of gas bombs and live bullets by the Israeli occupation army, he left the tent, which was 700 meters away from the border fence, down Jakar street (300 meters away from the border fence), and positioned himself near the vehicles and ambulance to film the events. Ten minutes after he arrived, at around 2:10PM, while he was very busy filming the demonstrators who were near the separating fence, he was injured by a gunshot in the left side of his abdomen and fell to the ground. He was transferred by an ambulance to the Indonesian Hospital, north Gaza Strip, where he was immediately taken to the operations room and underwent a lifesaving operation, as he was suffering from internal bleeding, according to the eye-witness doctors who were at the Hospital and described his condition as serious. After the Israeli foot-dragging, and due to pressures by several Human Rights Organizations, the Israeli occupation, at around 7:00PM, on Sunday, corresponding 15th April 2018, allowed to transfer him to the West Bank to receive treatment. He arrived at Palestine Medical Complex in Ramallah by the ambulance, at around 12:00 midnight. On the following morning (Monday, corresponding 16th April 2018) he underwent a surgery and his situation became relatively stable until the evening of Thursday, corresponding (19th April 2018), his health condition relapsed and he was transferred to Israel Tel Hashomer hospital (the only Israeli hospital which agreed to admit him). He arrived the hospital at 12:00 midnight, the doctors were on their Friday-Saturday leave. On Sunday, corresponding 22nd April 2018, the Israeli doctors gathered to evaluate his condition, and decided that there is no treatment for him as he suffers from brain damage. They decided to send him back to Gaza Strip; however, his mother refused, and he remained in hospital until he was announced dead at around 3:35PM, on Wednesday, corresponding 25th April 2018.

### Physical Attacks:

Israeli physical attacks against journalists continued to rise during 2018, until they amounted to 242 attacks (including two murders of two journalists) compared to a total of 137 physical attacks monitored during the preceding year 2017.

By comparing the years 2017 and 2018, and in parallel with the increasing number of attacks, the proportion of the annual total Israeli attacks has sharply risen. Where the Israeli physical attacks constituted a rate of 37% out of the total Israeli attacks committed during 2017, these attacks have jumped during 2018 and exceeded 53% out of the registered Israeli attacks. In other words, more than half of the Israeli attacks are increasingly targeting female/male journalists directly, while the remaining attacks range between the other 15 types of attacks varying in seriousness, but in general, aimed at silencing journalists and hindering their work in Palestine.

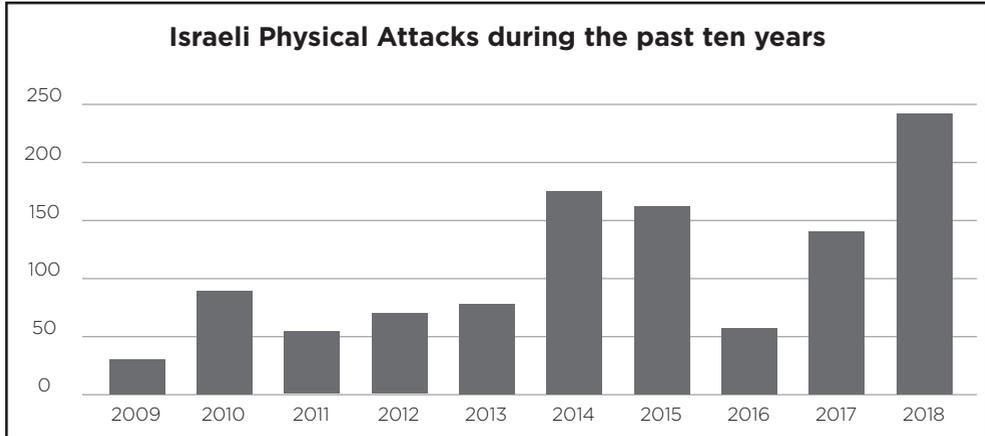

Most of the physical attacks fall under the extremely serious attacks which reflect the systematic targeting of female/male journalists aimed at keeping them away from the field or spreading terror among them to prevent them from covering the events by the excessive use of force.

#### Israeli physical attacks during the past ten years and their proportion out of the total Israeli attacks

Year	Total Israeli attacks	Physical attacks	Proportion of total Israeli attacks
2009	97	34	35%
2010	139	89	64%
2011	100	55	55%
2012	164	80	48.7%
2013	151	87	58%
2014	351	175 (17 of which murders)	49.8%
2015	407	166 (one of which murder)	41%
2016	249	58 (one of which murder)	23.3%
2017	376	139	37%
2018	455	242	53%
Total	2489	1125	45.19%

The physical attacks monitored during 2018, amounting to 242, could be classified into two main groups: first: the most serious and grave attacks, which amounted to 127 attacks, all resulting from the use of live ammunition (live and explosive bullets), metal bullets, and gas bombs, injuring dozens of female/male journalists directly, in serious and sensitive parts of their

bodies. Second: the remaining physical attacks totaling to 115 caused by beating (some of which have resulted in serious injuries and fractures to a number of journalists), or severe suffocation requiring medical aid in the field or in the health centers and hospitals. This is in addition to other numbers of injuries difficult to pin down caused to female/male journalists who suffered suffocation without receiving medical aid.

With regard to the first group of physical injuries totaled to 127, these injuries are distributed to 54 female/male journalists who were injured by live and explosive bullets and 73 female/male journalists wounded by metal bullets, rubber bullets and gas bombs fired directly at their bodies. In all these cases, the victims of female/male journalists have suffered severe injuries; some of them resulted in permanent disabilities, not to mention that two journalists, namely, Ahmad Abu Hussein and Yasser Murtaja, have died.

For example, photographer of Falasteen Newspaper, Yasser Abdullah Qudaih, was wounded by an explosive bullet in the abdomen on 14th May, causing serious injuries to him. He underwent a quick rescue operation, and later, parts of the spleen were removed and then he was transferred to Al-Makassed Hospital in Jerusalem due to his serious situation. Furthermore, on 27th April, the freelance journalist, Abdul Rahman Hani Al-Kalhout was wounded by an explosive bullet in the right foot. He underwent three operations to remove the fragments and treat the laceration caused by the injury.

The photographer Ahmad Salim Barbakh / Muammar was wounded on 30th of March by an explosive bullet in the abdomen. The x-ray showed that 14 fragments have settled in his body causing internal bleeding. About 30 cm of his intestines was removed. On 31st March, the journalist, Wissam Atef Mousa, was injured by two gunshots in both legs. Both bullets penetrated his both legs (causing an entrance and exit). The bullet that injured his left leg (believed to be 250 caliber) caused severe rupture of the leg muscle.

The reporter of Middle East Monitor, Mutasem Ahmad Ibrahim Daloul, was injured on 11th May by an explosive gunshot in his back causing him wounds in the kidneys, lungs, and liver. He stayed in the intensive care unit for five days and he also stayed another ten days in the Surgery Section. He

continued revising doctors after 15 days of hospitalization.

In the course of 2018, the Israeli soldiers deliberately fired tear gas bombs at the bodies of female/male journalists in the field. A total of 33 such cases were documented, most of which caused serious and severe injuries to journalists. This reflects the methodology of the Israeli occupation army to inflict the most severe harm on female/male journalists and to keep them away from the field of work.

Among all of these cases falling under the most serious and severe injuries, it should be indicated, for example, to the injury of the videographer of Reuters, Bassam Mohammad Masoud, on 18th May, twice only within 20 minutes while he was covering the events of the return peaceful march east of Khan Younes. The first injury was relatively minor as he was wounded by a gas bomb in the abdomen (even though he was wearing the Press shield). As a result to this injury, his phone was damaged. Only 20 minutes later, he was injured by another gas bomb fired by an Israeli soldier directly at his ear, causing him injuries and laceration that required 12 stitches.

On 19th Sep. 2018, the photographer of the Turkish Agency, Thaer Khaled Fahmi Abu Rayash, was injured by a gas bomb in the left side of his head while he was covering the return peaceful march east of Gaza. This injury caused him wounds and bleeding that required 6 stitches. After few several days, he felt dizziness and poor vision in the left eye. This is in addition to the injury of the journalist, Hanin Mahmoud Baroud, in the same area (east of Gaza) one week after a similar injury. One of the occupation soldiers fired at her a gas bomb that injured her head directly, causing her wounds that required 8 stitches. In the West Bank, specifically in Al-Lubban ash-Sharqiya School, while the French News Agency photographer, Jafar Ishtaya, was filming some Palestinian families and officials, as well as the Minister of Education, and Nablus Governor, opening the above mentioned school that the Israeli occupation army ordered to be closed on the previous day; the soldiers raided the place and forced the students and citizens to get out of the school by firing rubber bullets and gas bombs.

While the journalist, Ishtaya, exited at the main gate of the school, one of the soldiers, from a very close distance, fired a gas bomb at him and wounded his head. After he was transferred to Rafidia Hospital(Nablus), it was found that his wounds caused him fracture in the skull and brain concussion. The doctors described his condition then by moderate.

### **Targeting Media outlets:**

The Israeli occupation army and authorities during 2018 have destroyed two media outlets, closed another two, and seized the equipment and machines of another one.

It should be noted that the number of media outlets and printing houses targeted during 2018 is few (only 5) compared to the number of closed and targeted during 2017, amounting to 17. This is in addition to the seizure and vandalism of equipment for a total of 27. However, the seriousness of the attacks monitored during 2018 targeting media outlets in Palestine which have affected a limited number of them (only five), is no less great

than those monitored during the past year. Especially that the attacks of the occupation army during 2018, in contrast to the preceding year, have included destroying two, namely Said Al-Mishal Establishment for Culture & Science, and Al-Aqsa TV Headquarters composed of five floors, in which 220 staff members are working. After the Israeli army warned the staff members through a phone call to evacuate the headquarters within minutes as the army will destroy it. Indeed, this is what actually happened.

According to the investigations conducted by MADA field researcher, and based on the statements of the journalist, Saleem Muhsen Al-Sharafa, the presenter and preparer of Al-Aqsa TV programs, Al-Sharafa has received a phone call from a private number (no caller ID), at around 8:20 PM, on Monday, corresponding 12th Nov. 2018, when he just arrived his home on his way back from work. The caller introduced himself as “Abu Dawoud” from the Israeli Intelligence Services, and asked him “Where are you?”, Al-Sharafa replied that he just arrived the house. The Israeli officer asked him to inform his coworkers at the TV Office to evacuate the headquarters as it will be bombed by the Israeli drones after 10 minutes. Al-Sharafa questioned his credibility, and the officer replied “when you see the reconnaissance rockets, you will be certain, but then you will be held responsible for the lives of your coworkers if you did not tell them. Now go and tell them to leave the headquarters room by room”. Immediately, Al-Sharafa contacted his coworkers and told them what happened. He was informed that the same caller has contacted another number of the staff members at the TV Headquarters, namely, the Programs Director, Imad Zaqout, and the Broadcaster, Islam Bader, and asked them to evacuate the headquarters immediately as it will be bombed. Immediately, the staff members started leaving the headquarters, and before everyone left, the launching of the “warning” reconnaissance rockets started intermittently at around 8:30PM. About eight “warning” rockets were launched at the headquarters within half an hour. At around 9:00, an F16 targeted the headquarters with four rockets fired intermittently until 9:25PM, which led to the complete destruction of the headquarters including the equipment and machines. The staff members could not take out any of the equipment or machines. Furthermore, the destruction of the headquarters led to some damage to the neighbouring houses near the headquarters located in a residential area. The TV transmission interrupted completely for few minutes; however, Al-Aqsa TV managed, few minutes later, to continue its transmission from another place. MADA field researcher, who followed up the bombing of the headquarters from the very first moment, has documented that a reconnaissance aircraft has targeted the headquarters with eight rockets, with two minutes only between each. This was right before the F16 warplane started firing four rockets at the headquarters resulting in its complete destruction.

According to the statements of Al-Aqsa TV Director, Ibrahim Thaher, to MADA researcher, “the TV headquarters is composed of five floors, with a total area of 1000 square meters (half of which is studios), with about 220 staff members. The losses incurred by the office due to the destruction of its headquarters are estimated at about 4 million USD. The time given by the occupation to evacuate the headquarters was not enough, given the

great number of staff members. The staff were unable to take out any of the expensive equipment from the Headquarters and they were completely destroyed”.

This is the second time the headquarters of Al-Aqsa TV is destroyed as it was first bombed and destroyed during the last war on Gaza Strip of 2014.

In a similar scenario, Said Al-Mishal Establishment for Culture & Science was also destroyed in Gaza, in the afternoon of Thursday, corresponding 9th August 2018, for allegedly being used as Hamas headquarters.

In addition to that, the Israeli authorities have prohibited Al-Quds TV to operate in the occupied city of Jerusalem and inside Israel. They also prohibited Al-Basheer ProMedia, a media production corporation, rendering media services to the TV Office, to work with the Office. The Israeli police summoned the Director and two of its staff members, questioned them in parallel with arresting Al-Quds TV reporter who works for the Office from home. The Israeli authorities informed them to stop working with the TV office under any circumstances and this happened on 9th July 2018. Moreover, the Israeli intelligence services closed “Elia for Media” Agency after it was raided on the afternoon of 18th April 2018, located in Salah Al-Din street, in the occupied city of Jerusalem, given that none of the staff members were in the headquarters then. They avoided coming to the headquarters on that day because of a tweet by the Israeli Defense Minister, Avigdor Lieberman, posted two days before the event (Monday, April 16, 2018) on Twitter describing Elia For Media as a “terrorist agency”. The Israeli police and intelligence officers placed a closure order at the agency’s entrance until further notice, as reported to MADA by the Agency’s Director, Ahmad Hussein Al-Safadi.

Furthermore, the occupation army has raided Al-Noor Printing house, in Ramallah, at dawn, on 6th Dec. 2018, after blowing up its main doors and seizing 6 printing machines of various types, and a computer. Mr. Khaled Hussein Musafar, has estimated the losses resulting thereof by more than 32,000 NIS. It should be noted that this is the third time Al-Noor is raided and vandalized. On 30th Dec. 2017, Al-Noor was similarly raided by the Israeli Army and seized all of the printing machines, equipment and computers. They also raided and vandalized it previously on 30th Jan. 2017, and seized 25 printing machines and a computer then.

### **Arrests:**

The year 2018 has witnessed a rise in the number of journalists who were arrested or detained by the Israeli occupation army and authorities compared to the preceding year.

The year 2018 has witnessed a total of 41 arrests and detentions compared to 33 arrests and detentions witnessed in 2017; that is, an increase estimated by eight cases.

Among these cases is the arrest and detention of five female journalists and media students, namely: Ola Marshoud, Manal Al-Jabari, Lama Khater, Israa Khader, and Suzan Al-Ewiwi. The journalist, Manal Al-Jabari, who works for B'TSELEM, the Israeli Information Center for Human Rights in the Occupied

Territories, in Hebron, was arrested and detained twice during her field work in Hebron in 2018. One of these arrests took place on 22nd April 2018, and she was assaulted by girl soldiers who handcuffed her and tried to strip and search her when she attempted to film the occupation soldiers detaining one woman and two young men at a military barrier, near the Cave of the Patriarchs, in Hebron. This was culminated by a decision to keep her away and prevent her from accessing the Cave of the Patriarchs for a period of 15 days. She was also prevented from covering the events in that sensitive and critical area.

**(the Israeli arrests of journalists during the last ten years)**

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	Total

The conditions for the arrest and detention of these female/male journalists have varied. Some of them were arrested from their homes during the night hours, while others were detained in the field while covering events. Preventing from coverage was the main motive for most of these arrests.

Like with the journalist Manal Al-Jabari, who was assaulted during her arrest, removed from the field, and prevented from coverage for 15 days, many other journalists were arrested, detained, and subjected to physical assaults and measures that prevent them from coverage, or keep them away from the work field, or other measures that lead to the same. On May 31, 2011, Wahbi Makiya was beaten by the Israeli police in Jerusalem (with their fists and legs) while he was filming a program for the Fourth Dimension of Media Production, in which he works as a freelance photographer. Then, he was taken to the police investigation center in Salah Al-Din Street in the city, where he was threatened with imprisonment and remained in detention for four hours before he was released at 8:00PM. Ahmad Al-Safadi, the Director of Elia Media Agency, was arrested and detained three times during 2018. In one of them, he was arrested from his home on 5th June 2018 and it ended up with his release on bail after he was forced by the occupation authorities not to participate or attend any popular events for a month, not to mention that he was prevented from media coverage for one month. The same happened to the author Rassem Obeidat, who is also from Jerusalem. After being arrested and interrogated for several hours, he was returned after three days. He was arrested for four days and he was subsequently released under restricted conditions of paid bail and house arrest for a week provided he shall not participate in any national economic and social activities for one month.

The same scenario of removal from the field of events and preventing from media coverage unfolded for various periods, in addition to house arrest, or beatings with another number of journalists who were arrested or detained during 2018.

**Preventing from Media Coverage:**

Preventing from coverage and blurring the actions of the Israeli occupation army and authorities as well as their policies and attacks in Palestine are deemed as the first and last target of the Israeli occupation authorities and army attacks against journalists and media outlets.

Blurring and blocking the picture and events is done by various methods including physical assaults and killings, the arrest of journalists, the closure or destruction of media outlets, and the direct prevention of media coverage, which may be considered the least dangerous compared to the other attacks that lead directly and indirectly to the removal of journalists and media outlets from the field of events. That is, it fulfills the occupation authorities and army wishes represented in not conveying the image of what is happening and restrict the same to the occupation’s scenario.

With regard to the direct prevention of media coverage, MADA has documented during 2018 a total of 72 cases of prohibition of media coverage (many of which included more than one journalist or a group of journalists). It also documented 41 cases of detaining journalists while they were covering events in the field, in addition to four cases in which the occupation forces has deleted materials filmed by female/male journalists in the field. This means that a total of 117 cases of prohibition of media coverage registered during 2018 out of the overall Israeli attacks amounted to 455, equivalent to about 26% of the overall Israeli attacks.

The year 2017 has witnessed a total of 77 cases of prohibition of media coverage distributed to 38 cases of direct prohibition of coverage and 39 cases of detaining female/male journalists on their duty in the field in addition to five cases in which the materials filmed by journalists were deleted.

Comparing between 2018, in which 117 cases of prohibition of coverage were registered, and 2017 in which 77 cases of prohibition of media coverage were registered, it is evident that the number of this type of Israeli attacks has risen in 2018 by 40 cases, equivalent to about 52% compared to the preceding year.

## THE PALESTINIAN VIOLATIONS

In comparison with the previous year, the number of Palestinian violations against media freedoms in the West Bank and Gaza Strip declined from 154 in 2017 to a total of 129 attacks in 2018, most of which occurred in the West Bank (88 violations) while 41 violations occurred in Gaza Strip.

No	76	79	106	74	78	114	192	134	154	129	1136

Although it has declined by 25, a rate of 16%, in 2017, this decline does not reflect a real or positive improvement in the status of media freedoms in Palestine in terms of the respect for media freedoms by the governing Palestinian authorities in both the West Bank and Gaza Strip.

This decline is attributed to two main reasons, firstly, the limited number of events and field activities (demonstrations, marches, sit-ins...etc) involving friction with the official authorities in both the West Bank and Gaza Strip. The second reason is the prevalence of self-censorship and the avoidance of female/male journalists and the media agencies to address many issues that

they are aware will cause them troubles if they would publish.

For example, An-Najah National University has prevented the media student, Osama Arar, on 17th March 2018, to enter the university where he studies (something like suspension) because of a Facebook post he shared on his account in which he compared between his University (An-Najah) and Birzeit University. The University security asked him to delete the post and to admit that he made a mistake. The Investigation Department at the Ministry of Interior in Gaza Strip has prevented, on 1st August 2018, the conclusion of a seminar at Abdullah Al-Hourani Center, organized in cooperation with the Journalists Syndicate, on the role of media in activating the prisoners issue, for allegedly not obtaining a prior authorization even though such seminars are usually concluded inside the center for many years.

These two examples (not the only ones) indicate the available boundaries of media freedoms, how the media and journalists are handled, and the freedom of speech and expression by various Palestinian institutions, on top, the official and security institutions.

### ► **Palestinian Violations in the West Bank:**

The year 2018 has witnessed a total of 88 violations against media freedoms in the West Bank, which reflects a decline compared to those registered in 2017 (which has witnessed a total of 119 Palestinian attacks against media freedoms in the West Bank) by 31 violations; in terms of percentage, a decline at a rate of 26%.

The Palestinian violations in the West Bank during 2018 fall under ten types. However, the greatest part of which fall under three types, namely: summoning and questioning (21 cases), arrests and detentions (17 cases),

and physical assaults (16 cases). These three types have totaled to 54 attacks, at a rate of 61% of the overall Palestinian violations registered in the West Bank during 2018, amounted to 88 violations.

### ► **Palestinian Violations in Gaza Strip:**

The year 2018 has witnessed a slight rise in the number of Palestinian violations in Gaza Strip amounting to 41 violations, which is slightly higher than that registered in 2017, amounting to 35 violations.

The Palestinian violations in Gaza Strip fall under six types; however, most of which fall under three types, namely: summoning and questioning, in most of the cases, associated with repeated detentions for long hours (24 cases), physical attacks (6 cases), deleting media and video material (5 cases). These types have totaled to 35 violations, constituting a rate of 85% of the overall Palestinian violations registered in Gaza Strip in 2018, totaling to 41 violations.

NO	27	33	62	37	50	24	76	48	35	41	433

Apart from their number, the nature and types of Palestinian attacks in the West Bank and Gaza Strip are very similar. The cases of summoning and questioning, including the part of which associated with long hours of detention under difficult circumstances, and the cases of physical attacks in both, the West Bank and Gaza Strip, were mostly registered, which is much the same as in previous years in this particular segment.

### **Physical Attacks:**

The number of Palestinian physical attacks against female/male journalists during 2018 has risen to 22 attacks (16 of which were committed in the West Bank and six in Gaza Strip) compared to 13 attacks committed by Palestinian authorities in the West Bank and Gaza Strip during 2017.

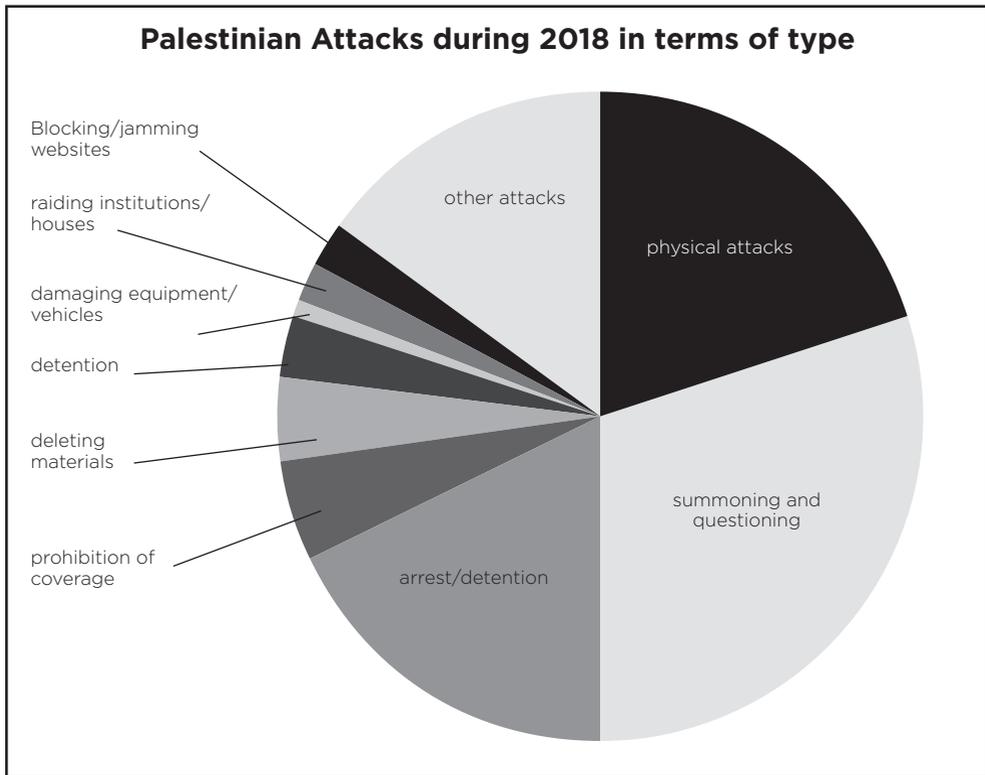

The greatest part of these attacks in the West Bank during 2018 is represented in the suppression of the Palestinian security services in the West Bank of a protest held in Ramallah on 13th June 2018 to demand the suspension of sanctions on Gaza and to pay the salaries of employees there. The Palestinian security officers dressed in civilian clothes assaulted at least 12 journalists while covering the sit-in and prevented them from covering the event. These attacks were carried out in the presence of the Palestinian police who were in their uniforms.

These attacks have also affected three female journalists who were beaten and suppressed violently, namely: Hiba Hassan Iriqat, Naela Khalil, and Jihan Hassan Awad. About ten persons tried to cover the eyes of the journalist, Iriqat, handcuffed her hands, beaten and kicked her, which made her fall to the ground. They also tried to seize her cell phone even though she told them that she was a journalist, and showed them her press card. Furthermore, the journalist, Naela Khalil was also attacked by a number of persons who were putting hats marked “Fateh” not to mention that also security officers assaulted her and sprayed pepper at her face.

In similar circumstances, all of the physical attacks in Gaza Strip were against six journalists in suppressing a single sit-in organized in Gaza Strip, on 18th June 2018. Some persons belonging to Hamas and security officers (in civilian clothing) have assaulted female/male journalists while they were

covering a peaceful sit-in, organized by the Detainees and Ex-Detainees Commission, in cooperation with the Committee of Prisoners of National and Islamic Forces, in Al-Saraya Square, central Gaza, under the title (the Peaceful movement to end the division, lift sanctions, and recover the rights of staff members). They seized and smashed some of the equipment of these journalists and deleted the materials they filmed. They also prevented them from coverage, not to mention that they assaulted the demonstrators, smashed the rostrum which was prepared for the sit-in that was cancelled as a result.

The discrepancy in the number of physical attacks in the West Bank and Gaza Strip registered in 2018 may be referred to the limited number of field activities (opposition to the policies of the governing authority) organized in Gaza Strip compared to the West Bank<sup>3</sup>, which are usually rejected and repressed by the security services, which has also affected Journalists and media outlets that are often prevented from coverage, and suppressed if they do so, as can be seen from these examples.

### Arrests:

The year 2018 has witnessed a total of 17 cases of detention and arrest of journalists carried out by Palestinian authorities. This represents a decline by nearly the half compared to each record of detention and arrest in 2017, which witnessed 32 cases of arrest and detention in the West Bank and Gaza by the Palestinian authorities.

#### (Palestinian arrests of journalists during the past six years)

	2013	2014	2015	2016	2017	2018	Total
West Bank	8	14	18	15	24	17	96
Gaza Strip	14	1	13	6	8	0	42
Total	22	15	31	21	32	17	138

All of the arrest and detention cases which have targeted journalists during 2018 have occurred in the West Bank.

The motives or justifications of the security services for arresting and detaining journalists are diverse, and may be directly related to materials they have published or other pretexts. As what has happened, for example, with the reporter of Al-Quds newspaper in Qalqilya, Mustafa Sabri, who was detained and questioned by the Preventive Security Service for two days. His personal card was seized, and he was called four times after he was released, claiming that one of his sons “has received in 2014 his university fees from an embargoed authority”.

Although no cases of arrest or detention were registered in Gaza Strip, the security services there have applied a method that amounts to arrest and detention in essence. They used the method of summoning and detaining a number of journalists for long hours, in some cases for more than 12 hours, until midnight. This was associated, in some cases, with detaining

<sup>3</sup> For example, the security services in Gaza have prevented Fateh movement from commemorating its launch, which is celebrated on January 1 of each year. Note that the prevention of activities which the authority does not like is not limited to Gaza but is practiced by the security services in the West Bank as well.

journalists in stinky cells. This process was repeated as the detainee was released at night provided he shall return on the following morning and re-detained for a similar period of time. For example, the journalists Samir Rafiq Sakaik, Ahed Hassan Farwana and Samah Younis Al-Jedi, who were summoned and detained by the Internal Security Agency in Gaza more than once for long hours.

**Summoning and Questioning:**

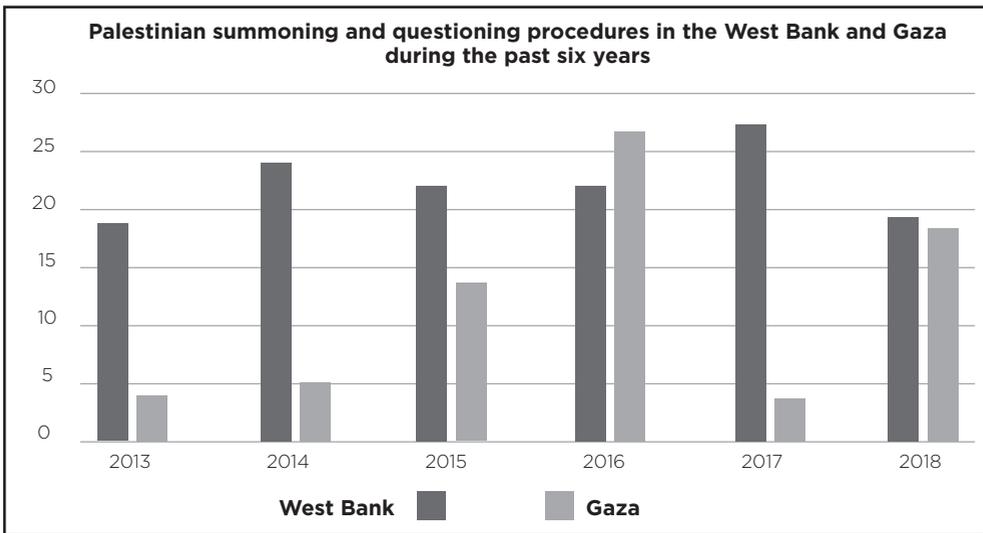

The summons and questioning, which may include threats, direct and indirect pressures, physical attacks, arrests and detentions are among the most prominent types of violations committed by the security services in the West Bank and Gaza Strip against female/male journalists.

The abovementioned three types have accounted for 84 attacks in 2018 out of a total of 129 Palestinian violations against media freedoms in the West Bank and Gaza Strip, accounting for 65% of the overall Palestinian violations.

**(Cases of summoning, questioning, and detention in the West Bank and Gaza Strip during 2018 and the preceding five years)**

	2013	2014	2015	2016	2017	2018	Total
West Bank	19	25	23	23	28	21	118
Gaza Strip	5	6	15	28	4	24	62
Total	24	31	38	51	32	45	180

The number of summonses and questioning cases registered in 2018 has risen to 45 compared to 32 in the previous year in the West Bank and Gaza Strip. This increase is mainly due to a significant increase in the number of cases recorded in Gaza Strip, which rose from 4 cases in 2017 to 24 cases.

Usually, the security agencies summon and question the female/male journalists for many reasons, mostly because of the materials or comments they post, or the threatening messages they transmit to them in connection to their media activities.

As was the case, for example, with Palestine TV staff in Gaza, who was summoned and questioned because of a television report on an attack against a child by persons belonging to Hamas in Gaza. The TV staff was prosecuted, summoned, and questioned by the Investigations Services in Gaza throughout a period of three days (25th, 26th, and 28th, August, 2018) for the charge of “forgery and fabrication”. They were also detained for relatively long periods. Or as was the case with the freelance journalist, Musab Khamis Qufaisha, who was summoned by the Palestinian Intelligence Service in Hebron on 25th Sep. 2018. He was questioned and forced to delete a news group he had created a month ago under the name of “Hebron People Group” after he was threatened to be arrested. It should be noted that this group included 1700 members, and it was posting political, social and economic news.

This procedure (summoning and questioning) is sometimes used as a form of indirect punishment by repeating the summoning one or the other several times. Such a procedure is often take in parallel with detention which may last for hours at a time.

## RECOMMENDATIONS:

It is evident that the Israeli occupation authorities apply a policy based on silencing the Palestinian media outlets, and they apply this policy gradually. In our letter to three special rapporteurs at the United Nations, we have explained the nature of this policy and the procedures emanating thereof. Therefore, we recommend the dispatch of an international fact-finding mission, and to take a serious stance on the part of the international community represented by its bodies and agencies concerned against the policy of the occupation, as well as to hold accountable Israel for the same. Otherwise, the occupation policy would indeed silence the Palestinian media or most of the same, during the few coming years, and establish self-censoship.

At the Palestinian level, and despite the decline in the number of violations by 19% compared to 2017, this decline does not reflect an actual improvement on the status of media freedoms in Palestine or a positive development to the respect for media freedoms in the West Bank and Gaza Strip by the governing Palestinian authorities. We still believe that decision makers address the significance of freedom of expression merely as a slogan for consumption and public relations, so we demand the respect of the freedom of expression, approve revelant media laws and access to information law, inaddition to to hold accountable those responsible of attacks against journalists.

“The soldiers then took the program guest to his car, searched him and confiscated his ID, two additional military jeeps arrived. After I arrived at the checkpoint and because they know me in person and they know the place of my work, they left the people they hold and they held me.

The policewoman began inspecting me thoroughly so that she emptied my bag and threw everything on the ground, and she searched by her hands. She asked me to stand on the wall and raise my hands, but I did not respond to her orders. So she called an officer, who came with other five border guards, and shouted at me to obey police orders. When I refused, he assaulted me and forced my hand behind my back and pushed me hard against the wall. He asked the policewoman to inspect me in the upstairs room. When I went up to the inspection room, which was of glass, I refused to take off my clothes and she began pushing me with her hands because of my refusal to be inspected. From time to time, she used to turn my hands to my back strongly with another policeman and they insulted me.

Around 2:30 pm, the policeman asked the policewoman to take me to the mosque police station and I was actually pulled there after half an hour of inspection and humiliation. With another police woman who was there, she took me to a room and asked me to fully take off my clothes. When I refused, she went out to tell the officer in charge. At this time I made a phone call with Betsalem organization. They became crazy when they knew that I called the organization and the officer asked the policewoman to

search me normally and release me. She took me out and then the officer decided to release me. I told him that I want to file a complaint, but he re-assaulted me and turned my hands to my back painfully, pulled me to inside the station and pushed me to the floor, handcuffed my hands and told me that I am detained. One hour later, I was transferred to Jaa'bara police station to arrive there at about 3:00 pm. Over the interrogation, there was no charge, but after telling all the incident details, the officer decided to prevent me access to the mosque area for 15 days and scheduled a court hearing for me to be on 6/9/2018. I was released at 9:00 pm.

Two days after my release and due to the strong pains I felt in my neck and shoulders, I went to the Shifa' Medical Complex in Hebron and received the necessary treatment as they found bruises on different parts of my body."

Al-Hayat Al-Jadida photographer, Issam Al-Rimawi reported: “At 11:00 AM, on 13 May 2018, while a number of citizens were actively planting olive seedlings in the territories of Turmosaya, they were attacked by 10 Israeli settlers who have rooted out the olive seedlings which were planted and assaulted those who have participated in the event, in sight of the Israeli occupying forces, which were present to prevent the Palestinian journalists from covering the event. They threatened and prevented the journalists, Mohammad Turkman, a photographer at Reuters, Hisham abu Shaqra, a Photographer at the Turkish Anatolia Agency, and Issam Al-Rimawi, a photographer at Al-Hayat Al-Jadida newspaper, to cover this event”.

“There were no clashes, the event was very peaceful, and we were carrying our imaging equipment. We did not wear the press uniform since the event was peaceful. The soldiers, who were border guards (wearing dark green uniforms), forced us out, pushed us and threatened to destroy our cameras. Without any warning, they violently pushed our cameras (whenever any of us carried his camera to shoot), and they pushed us very hard. This has happened to me and my colleagues, Hisham abu Shaqra and Mohammad Turkman”,

Al-Rimawi added.

(13/5) Israeli security components have attacked a reporter of “Palestine Voice” Radio in Jerusalem, the journalist, Mohammed Khalil Abed Rabbo Fasfous (56 years old), when he was at Al-Misrarah Market entrance in Jerusalem to cover a march of the Israeli settlers. He was pushed very hard by the security components and fell to the ground resulting in bruises in his back which caused him to stay at home for one week under the recommendation of doctors. Fasfous has reported to MADA “me, and a group of my colleagues, were at the main entrance of Al-Misrarah Market, in Jerusalem, to cover the march of Israeli settlers organized annually. We were forced out and pushed more than five meters away from the main street. Prior to that, I had put my phone to be charged in one of the cell phone stores. Subsequently, the Israeli soldiers of the border guards forces came and ordered the owner to close the store, but he refused to respond to their orders and requested them to bring into view a court order that obligates him to close the store. Meanwhile I tried to take back my phone from the owner of the store, one of the soldiers rushed from behind and pushed me very hard, and when I turned round to him, he pushed me again more violently, I heavily fell on my back to the ground”.

“When I fell to the ground, I felt my back was broken in halves. I tried to stand up, but I couldn’t. A woman saw me and helped me to stand up; I walked slowly and crawled until I reached Al-Natshah Butchery. There I sat on a chair, but given the severe pain I felt in my back, I could not sit down, so I laid down on the floor

for half an hour until the ambulance of Nouran Association arrived after it was called upon by the butchery owner. The ambulance took me to Al-Maqased Hospital where I underwent medical examination, the place of injury was x-rayed, and I was heavily bruised. I left the hospital around one hour later, and the doctor recommended that I rest at home for one week without work” he added.

“After I fell to the ground, I suffered from intense nausea and sweating. When I was in the butchery, I suffered slurred speech and inability to speak. Today, about 10 days after my injury, I still suffer severe pain due to the trauma and bruises caused by the injury” Abderabbo added.

(14/5) the freelance photographer, Yasmin Akram Al-Na’ouq (24 years old), shot with a bullet in her back and a gas bomb while she was covering the return march events, to the east of Jabalia, on 14 May 2018.

In the meantime, the soldiers stationed near the border fence fired a brutal barrage of live bullets. One of the bullets hit her in the back while she was shooting using a “tablet”. Shortly thereafter, the tablet fell from her hand and crashed. She hardly asked for help until a small drone fired about 30 gas bombs, two of which hit her in the back, (one in the back and the other in her side).

Al-Na'ouq reported that she lost consciousness and did not wake up until she reached the field medical point in the eastern part of Jabalia and heard the doctor saying that she needs to be taken to Al-Awda Hospital, but she soon lost consciousness and could not regain her consciousness until late at night in Al-Awda Hospital, where she found herself on the bed with her family surrounding her.

Al-Na'ouq was discharged from the hospital at 3:30 PM, on the following day, corresponding 15 May 2018, under the doctor's warning to avoid movement for fear that her injury in the back may aggravate. The doctor also asked her to make CT Scan for fear that there might be laceration in the bones. However, until 7 June 2018, she did not run the scan given the overcrowding at Al-Shifa Hospital with those wounded in the peaceful return marches. Yasmin Al-Na'ouq stated that she is still suffering from suffocation and headache due to gas inhalation, exhaustion, and back pain.

(18 June) Some persons deemed loyal to Hamas, along with security agents (in civilian clothes) have attacked at least 10 journalists while

covering a peaceful sit-in planned for by the Ministry of Detainees and Ex-Detainees, in cooperation with the Prisoners Committee for National and Islamic Forces. The sit-in took place at Al-Saraya Square, in Gaza Strip, at around 11:00AM, on Monday, corresponding 18 June 2018. It was titled (The peaceful movement to end division, lift the sanctions and recover the rights of the employees). They seized and destroyed some of the equipment of these journalists, deleted the materials they had filmed, and prevented them from covering. They also attacked the demonstrators in the sit-in and destroyed the stage which was built for the sit-in.

According to the investigations conducted by MADA field researcher, and although the Ministry of Interior in Gaza has allowed the Ministry of Detainees and Ex-Detainees to organize a sit-in at Al-Saraya Square in Gaza, but once the sit-in began, with the participation of hundreds of citizens, a group of young people, some of whom came out of the mosque near the sit-in, wearing the keffiyeh and white hats, have raised signs and shouted slogans non-agreed upon according to the organizers of the event. For example, they were shouting /the people wants the fall of the President from power/ (President Mahmoud Abbas). They were also shouting "Get lost Abbas". Which is why the organizers of the event have requested to unite the slogans, however, the group of young people refused, which caused a verbal altercation between them, which soon aggravated to attack with sticks and hands against the demonstrators in the sit-in and the journalists who were covering the event. It was later

found that security agents in civilian clothes were deployed among the demonstrators. The members of the “intruders” group broke into the sit-in, destroyed the stage and attacked the demonstrators. They pursued the journalists and all those who filmed the events, attacked some of them and deleted the photos and videos they had taken in their cameras, prompting the organizers of the sit-in to cancel it.

These persons have forced journalists, including, Shireen Khalifeh, Nahed Abu Herbid and Muthana Al-Najjar to delete the photos and videos they have filmed on their mobile phones.

The journalist, Shireen Hamed Khalifeh, who works at Nawa Media Network, has reported to MADA field researcher that she went with her colleague, the journalist, Nahed Abu Herbid, to cover this sit-in. When they arrived, they took some photos with their cell phones, after the attacks, and after destroying the sit-in stage by agents in civilian clothes, a person also in civilian clothes has approached her, and introduced himself as an agent from the General Investigation, but did not show any card to prove so. He asked the three persons standing behind her to go further back, and asked Abu Herbid to delete the photos and videos on her phone, when she told him that there are 4 personal photos only on her phone, another one replied “no problem, we have female agents who can search your phone”. He added “Only if you can film anything in the West Bank, you can then film in Gaza”. The journalist, Nahed Khaleel Abu Harbid, a reporter at “218 Media”, has reported that she was close to the sit-in stage, and after she documented the stage being destroyed, a huge, bearded man, in

black clothes, has approached her and asked her to delete the photos. He also asked her colleague, Shireen, “to take out her phone from her purse and delete the photos”. He introduced himself as an officer from the General Investigation without showing any card to prove so”. As to “Al-Hadath” Newspaper reporter, Muthana Sulaiman Ibrahim Al-Najjar, he reported that while taking pictures with his phone to a group of bearded people putting on hats, while shouting and holding up signs in the sit-in demanding to lift the sanctions imposed on Gaza, not to mention that they were also shouting and cheering against the President Mahmoud Abbas, one persons of the group grabbed Muthan’s phone from his hand and prevented him from filming. However, the leader of the Democratic Front, Talal Abu Zarifa, who was near Al-Najjar, immediately intervened, and was able, after about five minutes, to return the phone back to him. However, all the photos he took were deleted, and the events came to an end. One of the persons who prevented him from filming approached Al-Najjar and introduced himself as an officer from the Public Relations of Hamas Movement Office, and he apologized for what has happened to him and informed him that they did know that he was the journalist, Muthana Al-Najjar.

After the events ended, the journalists Khalifeh and Abu Harbid were subjected to a smear campaign through the social media. They were accused of lying and treason after Khalifeh posted on her Facebook page the attacks she and her colleague Abu Harbid were subjected to at the sit-in.

The reporter of “Watan” TV, the

journalist Izz Al-Din Abu Eisha, has reported that he was prevented from covering the event and deleted the material he filmed after arriving at Al-Saraya Square around 11:30 to cover the sit-in. While he was preparing the camera to film the event and to interview some of the demonstrators in the sit-in, and while he was talking on his phone with the Administration of Watan News Agency where he worked, three men in civilian clothes attacked him and grabbed the phone and the camera out of his hands even though he has not filmed anything yet at that moment. They went in another direction, he followed them trying to know them or the authority they work under, but they asked him to remain silent. In the meantime, he saw Tawfiq Abu Naim, the Director General of the Internal Security Forces in Gaza, and he directly went to him and explained the attack he was subject to in details. After that, Mr. Tawfiq Abu Naim, called them and asked them to hand him over what they took from Abu Eisha. Indeed, they responded to Tawfiq and handed over the phone and camera. He then interviewed Abu Naim to explain the attacks against the journalists and the demonstrators to destroy the sit-in and left the location.

The reporter of Al-Taquadomi Media Team, Diaa Maliha, has reported that upon arriving at Al-Saraya Square, at around 11:45, along with his colleagues, Mohammad Al-Shirafi, Ammar Kiskeen, and Mohammad Salem, to cover the sit-in, and before filming anything or interviewing anyone, three individuals have approached and introduced themselves as agents from the Internal Security in Gaza. They took the equipment, the

camera and the cell phone, by force, under the pretext that a decision has been issued to prevent filming and documenting the event. This caused a verbal altercation among them, especially that they were in civilian clothes. It subsequently became a fight involving great number of security service agents in civilian clothes, who appeared after the withdrawal of the three persons mentioned above. They severely attacked Diaa, and his colleagues from the Team as they were trying to save him. They were all wearing the Press uniform with the name of the party they were working with shown. He managed to save himself, and found a large group of security men in civilian clothes attacking his colleague, Mohammad Salem. He approached them and tried to save him, they both hardly walked away. This is actually similar to the attack against the Director of Al-Taquadomi Mdia Team, Mr. Mohammad Al-Shirafi. He reported that the moment he arrived at Al-Saraya Square, with his other colleagues in the Team, and while he was trying to adjust the settings of the internet, a group of young men in civilian clothes approached him and introduced themselves as security men. They asked him and his colleagues to hand over their own phones and the camera he was carrying which belong to the Team, and after they refused to do so, they attacked them, and tried forcibly to withdraw their phones and camera. During that, the phone screen crashed after it fell on the ground as well as the camera's tripod. In the meantime, a number of persons in civilian clothes gathered and participated in the attack against the journalist, during which he was seen by one of his relatives

working with the security services, he approached him and asked them to move away from him, and saved him by force.

These attacks have also affected the photographer, Rashad Al-Amassi and Waseem Meqdad, who work for Khabar Agency. The agency's camera was destroyed about half an hour upon their arrival, a group of young men dressed in civilian clothes, who were shouting and cheering against the President Mahmoud Abbas, approached them and requested that Al-Amassi and Meqdad remove the memory chip from the camera and leave the area. (23 June) The occupation soldiers have arrested a photographer at Wafa news Agency, named Mashhour Hassan Mahmoud Wahwah, (34 years old), and a reporter at Palestine TV, Azmi Waleed Banat, (28 years old). They threatened a number of journalists with arrest and prevented them from covering a protest sit-in against settlement, organized by Bani Naim, in the east of Hebron.

According to the investigations conducted by MADA field researcher, Bani Naim Town families, at around 11:00AM, on Saturday, corresponding 23 June 2018, have organized a protest sit-in against the confiscation of the town lands for settlement purposes. Dozens of families went to the land above which the settlers have put a tent, inside of which, there were about seven settlers, in addition to the Israeli military jeep to guard them. Within a quarter of an hour, another military jeep arrived, an officer in the official Israeli uniform stepped out of the jeep, and ordered all the protesters to leave the area claiming that it is a “closed military area”. They refused to respond, and told the officer to get an official document which proves that it is a closed military area. In the meantime, a third military patrol arrived, from which a higher officer stepped out, and he seemed to be in charge, and ordered everyone (addressing them in Hebrew language), including the journalists, to leave the area immediately, claiming that it was

a “closed military zone”, where no one was allowed to enter without showing an official document that authorizes so. He showed them a photo on his phone claiming that it was the “military order”. Few minutes later, he arrested one of the protesters and threatened to arrest more if they do not comply with the order. The same officer began pursuing and threatening the journalists with arrest when they filmed the young man he arrested earlier. He addressed more than one journalist shouting, “If you will not leave, I will arrest you” and “if you film with the camera, I will arrest you”. These threats were also addressed to: AFP photographer, Hazem Jameel Bader, Reuter photographer, Yusri Mahmoud Al-Gamal, the European Agency photographer, Abdelhafaeth Al-Hashlamoun, Reuters photographer, working at the photography section, Mousa Issa Al-Qawasmy, Action Press Agency photographer, Wisam Abdelhafaeth Al-Hashlamoun, Anatolia photographer, Mamoun Ismail Wazwaz, Palestine TV staff, including Alaa Al-Haddad, and Azmi Banat, and Wafa News Agency photographer, Mashhour Wahwah. In the meantime, the soldiers began arresting a number of protesters, and the journalists continued filming carefully while walking away for fear of being arrested. The higher officer arrested the photographer of Wafa, Mashhour Hassan Mahmoud Wahwah (34 years old), and Palestine TV reporter, Azmi Waleed Banat (28 years old). They were taken to the military jeep, even though Azmi Banat was not carrying any cameras and he only carried the TV Microphone in his hand when he was arrested. It was found later

(as reported by Mashhour Wahwah to MADA researcher), that the soldiers have taken them, along with other protesters, to the Israeli police center, located in Kiryat Arba settlement, to the east of Hebron. Only the photojournalist, Mashour Wahwah, was questioned, and charged with “disobeying the Israeli army orders”, but he informed them that he does not know Hebrew, and could not understand what the officer said. The police has released them (Wahwah and Banat), five hours after their arrest and detention at the police station. The police investigator has informed Wahwah that they will review his case and see whether they could close his file or open a file for him. Before he was released, he signed on papers in Hebrew and was told that they were his statement. His fingerprints were also taken. As for journalist, Azmi Waleed Banat, he said he did not know why he was arrested since he did not film anything, especially since the soldiers deliberately insulted him and asked him to sit on the ground. The soldier who threatened him with abusive words, was the same soldier who accompanied them to the police station and continued insulting him.

The officer deliberately insulted and arrested the journalists violently so he prevents them from returning back to the area for fear of covering protests for the next few days. He used this kind of arrest and threat, believing that this would prevent journalists from coming back again.

It is one of several Bedouin communities in the same area. Its population is approximately 41 Palestinian families. It is located within the territories targeted by the Israeli occupation authorities for the implementation of the settlement project titled E1. The population living in this area are exposed to the risk of displacement after the Israeli occupation authorities have notified them with deportation and demolishing their homes based on the decision issued by the Israeli Supreme Court of Justice which

(7th July) A number of settlers, protected by the Israeli Occupation Army, have confiscated 20 Donoms of the lands of Al-Hamra, located in Bani Naim, east of Hebron, where they placed mobile homes and brought their livestock. On 7 July 2018, the owners of the confiscated lands at Al-Hamra went along with foreign activists to plough their lands, and a number of journalists went to cover this activity including the photographer of Palestine TV, Iyad Abdelhafaeth Al-Hashlamoun (28 years old), and his colleagues from the staff, namely Samia Abu Sharkh, Fadi Khlaf, and the photographer, Wisam Al-Hashlamoun. Due to the rugged terrain of the area, the journalists parked their cars about half a kilometer away from the lands they intend to plough, to which they arrived at 11:20 PM, where seven tents were set up for the settlers. Al-Hashlamoun began filming the arrival of citizens to their land. At the same time, approximately four jeeps of the Army arrived, in addition to soldiers' carrier and an Israeli police car. The soldiers began demanding the citizens to leave the place immediately, and they were speaking in Hebrew, out loud. The soldiers

started pushing the citizens and indeed the citizens began to retreat. In the meantime, an Israeli soldier went to Iyad and shouted at him in Hebrew. Iyad did not understand what he had told him. He ended his filming and left the site towards Palestine TV Vehicle which was parked half kilometer away from the site. When he arrived to the vehicle, three soldiers approached Iyad, grabbed him tightly from his hands and neck. He told them he was a journalist and asked them why they were doing this. One of them asked him in Arabic to keep quiet and took him to the military jeep even though he was carrying his camera, Tripod and microphone. It was found that the Israeli army arrested seven of the foreign and Jewish activists, a Palestinian activist and the journalist, Iyad Al-Hashlamoun, and took them in the army's jeep to the investigation center, located inside Kiryat Arba settlement in the center of Hebron. When they arrived, the soldier asked them to turn off their phones and not to speak at all. Iyad stayed with the group in the waiting room for about 4 hours. During this time, Iyad spoke with the lawyer Haya Abu Asfour. He was then brought to the investigation room where the interrogator told him that he was in a closed military zone and did not obey the orders of the soldier who asked him to leave the site, even though the soldier showed him a paper explaining so, Iyad replied that the soldier spoke in Hebrew and he did not understand what he said to him as he did not see any papers, and he does not understand Hebrew. The interrogator asked him who had called for the activity, and Iyad explained to him that he is the official reporter of Palestine TV and that he

went to the site under the instructions of the television and showed him a TV card. The interrogator asked him about the days or times when he goes to Alhamra and Iyad replied that he may go to any Palestinian area where events are taking place, since his job is a photojournalist. The interrogation lasted for about half an hour with Iyad. Then his fingerprints were taken as well as his signature on the investigation papers and statements, which were written in Hebrew, the language Iyad does not understand. The interrogator then told him that he was banned to enter Bani Al-Naim or the bypass road for a period of 15 days as of its date. (14th July) The Preventive Security Services has arrested Mohammed Saeed Jahaysheh, 34 years old, a programs presenter at Al-Marah local radio in Hebron, on the road, after he left the radio station to buy some stuff. His arrest came three days after he received a summoning which he ripped and did not respond to.

At around 12:00PM, on Wednesday, corresponding 11 July 2018, and while Mohammed Saeed Jahaysheh, 34 years old, was in his house in Idna, Hebron, he heard knocking on the inner door of his house (the house has two doors, one of them is an inner door which a person can reach only if he/she entered the main door, through the house yard, up to the stairs). He was in his bedroom and the window looks out into the inner door, he saw a man in civil clothing knocking the door, which surprised and provoked him as the man in the civil clothing was basically trespassing.

Mohammad opened the door and the man told him that he was from the Palestinian Preventive Security Services. He handed him over a notification stating that he must go to the Services headquarters. Mohammad took the notification, ripped and threw it in front of the man. He said to him that he had no right to enter the house in this way (he said he ripped the notification because of the way the man entered the house, and because he was exhausted, with no concentration since he did not sleep for long hours at that time and because he has not published any political posts on the Facebook two years ago). Three days

later, on Saturday, corresponding 14 July, 2018, after Mohammad finished presenting his program via Al-Marah Radio in Hebron at 9:30 AM, he went out to buy cigarettes, and he was surprised by a man he did not know approaching him and had a firm handshake with him. Soon after that, another two men joined him, grabbed Mohammad from his hands, and told him that they were from the Preventive Security Services. They took him to a white car of the Preventive Security Services, and asked him to turn off his phone and take off his sunglasses. When he arrived to the Preventive Security Services headquarters in Hebron, he was manually searched. He put everything in his possession in the safe and was transferred to a cell that smells so bad inside of which there was a blanket that smells stinky, not to mention that the ventilation inside the cell was almost absent. They closed the air vents of the door and he stayed in the cell around ten hours. Then he was taken to the investigation at the same time of the Maghreb prayers (at 7:50 PM). One of the officers who were with him in the room asked him why he ripped the notification and why he published a post about the security services on his Facebook page. He was also asked about an old post he has published previously about the Water Authority “which caused anxiety in Idna, and a post he has published two years ago because of which he was accused of attacking the Attorney General concerning the closure of Safa Agency”. After this investigation, they took him back to another cell upon his request. On the following morning, corresponding 12 July, he refused their request to sign his statement, and at around

10:00AM he was transferred to Dura Prosecution Office handcuffed with another accused person. There, he met his lawyer (Shaker Al-Tmaizi) who was appointed by MADA center. He spent two to three hours with the civilian detainees in the court waiting room before appearing before the chief prosecutor, in the presence of the representative of the Journalists’ Syndicate in Hebron, Jihad Al-Qawasmeh, who requested to speak with him and told him that he was detained for the charge of “blackmailing a girl”, and that this subject was closed and he has to open his Facebook page to release him immediately. Mohammad refused to open his Facebook page “as long as there is no order from the Public Prosecution to do so”. After that, the journalist Mohammad was brought to the chief prosecutor, and he requested the presence of the investigation lawyer. Indeed, the advocate Shaker Al-Tmaizi was summoned and initiated the investigation in the presence of the Journalists’ Syndicate representative, Jihad Al-Qawasmeh. He was questioned about ripping the notification and about his Facebook posts only. His detention was extended for 48 hours, and he was taken to a cell in the Prosecution office in Hebron. During the 48 hours, Mohammad was questioned seven times about ripping the notification and his Facebook posts. At one time, the interrogator repeated the same questions and suddenly asked him “Whose the girl you’re talking to? Mohammad replied that he is a journalist and he speaks with so many people. The interrogator asked “the girl you disrespectfully talk to?” Mohammad replied that even if there was someone he speaks with, what

does the Public Prosecution has to do with this? The interrogator cursed him “you are rude and disrespectful”. On the third day of his detention (On Monday afternoon), about 12 hours before the expiry of the detention extension ordered by the Public Prosecution, Jihad Al- Qawasmeh met him again and told him that the Syndicate wants to help him, but his case is not a journalist’s case, rather it is a “blackmailing case of a girl through the Facebook”, which is a very sensitive type of cases. He asked Mohammad to open his Facebook page during the investigation for five minutes on the same day. Mohammad refused again and he was presented to the interrogator again who asked him the same questions. Al- Qawasmeh asked the interrogator to properly detain Mohammad, accordingly, he was taken to another room in which there were other accused persons (one of them was charged with armaments while the other was a drug addict who continuously was smoking, then attacks Mohammad and tells him that he will kill him, in other sense, he was hallucinating). Mohammad stayed in the room about 12 hours, on Tuesday morning, corresponding 17 July 2018, he was transferred to Dura Court after he was charged by the Public Prosecution with contempt of a public servant and a security service. The judge heard the lawyer’s response and decided to release the journalist, Mohammad, under a bail of an amount of 500 JD, but it was late (2:00PM and the funds were closed), so Mohammad was taken again to the same cell. On the following day, Wednesday, corresponding 18 July 2018, he was released after the bail requested from him was changed to a personal

guarantee. The interrogator has informed Mohammad to return to the Services headquarter on Sunday. Mohammad was not informed with the reason of the notification he received in the first place, he did not know why the representative of the Journalists’ Syndicate addressed the case of blackmailing a girl while he was arrested. But he was asked so many times and more than once throughout the investigation about the posts he published on his Facebook page. He was charged with contempt of a public servant. A hearing session was scheduled for his trial on 26 November on which the witnesses will be brought (the employee from the Preventive Security Services who delivered the notification to identify the reason why he ripped it).

On the following day, corresponding 18 July, I went to the Israeli Military Liaison Office to find out the reason of my travel ban for security reasons. However, they did not help me other than explaining that it was a “police ban” without any reasons or justifications. They handed me over an official summoning paper

Then I entered the room of an officer called Captin “Kedim” (who is in charge of Sa’ir, Ash-Shuyukh, and Al-Arroub) for investigation purposes. He first asked about what I filmed on the day my uncle was released free from detention four years ago, and then moved to question me about the reasons why I want to travel and I answered for study purposes but the specialization I wanted to study was not available, he replied that I was banned for security reasons because I am a /terrorist / and that this ban was decided personally by him. He threatened me with arrest right from my house in the future. He also turned on my phone, opened my personal page of Facebook, checked the posts and noticed one post I have published about Khan Alahmar in which I described the occupation as Nazi for assaulting a child. He asked me about the post and I replied that he had to watch the video and after watching the video, he threw the phone hard on the ground. Finally, he told me that the ban is existing and I will not travel. They released me at about 3:30 PM”.

The Israeli Army has announced the arrest a Palestinian citizen (the night before) for the charge of incitement against Israel, in reference to the journalist, Ali Dar Ali. The spokesperson

of the Israeli army for the Arab media, Avichay Adraee, claimed in a tweet he published on his Twitter account that “under the framework of a large operation last night to arrest terrorist activists engaged in incitement, the Israeli border forces detained a Palestinian who systematically published incitement materials through the social media against Israel and the Israeli army”. He also claimed that “the detained Palestinian has filmed and edited videos for the Israeli Army soldiers during their duty in the field, not to mention that he encouraged violence against them, as well as attacking the Israeli army forces and Israel”. He also stated that “the Israeli Army sees the seriousness of such acts, and will work by all means to eliminate the incitement acts in the West Bank”. It is noted from the army’s statement that the intended was the reporter of Palestine TV, although it was not disclosed or mentioned that the detainee was a journalist or a reporter working for Palestine TV, but the official account of the so-called “The Coordination Unit of the (Israeli) Government’s Action” in the occupied Palestinian territories, has published explicitly a comment with the photo of journalist, Dar Ali, which reads “During the night, a number of Palestinians who regularly incite through the social media were arrested in recent months. Among the detainees was the journalist Ali Dar Ali from Burham. Words have power, incitement through the social media may kill and negatively affect stability! Do not be part of this! He incited, therefore he was arrested”. This is not the first time that the Israeli army has arrested journalists or activists on charges of “incitement”. It is evident from the statements of

journalists who have been arrested and released recently that the investigation was conducted about their work and about what they publish on social media websites, including any materials or comments that may be used against them as “inciting” material in many cases.

The Director of Palestine TV in Gaza Strip, Rafat Hammad Abdel Majeed Al-Qudra, (50 years old), from Al-Qarara, Khan Yunis, received at about 10:30AM on Saturday, corresponding 25 August 2018, a phone call from a person who has introduced himself as one of the investigation police officers at the Eastern Area center in Khan Yunis, and asked him to come to the headquarters. Accordingly, they sent a photographer and producer to film the interviews, and he sent the filmed material to the TV office in Ramallah, where the entire report was finalized. Subsequently, they asked him to contact the photographer, Mu'min Mohammad Hashim Al-Shobaki, (42 years old), from Gaza City, and the producer, Yousef Mohammad Ahmed Abu Maghsib, (38 years old), from Deir Al-Balah, and inform them to come to the investigation department at the police headquarters in the eastern area. Indeed, they arrived at the headquarter at around 3:30PM on the same day. Mu'min Al-Shubaki was interrogated in the same room where Al-Qudra was present, without intimidation, threatening or charging. Furthermore, Yousef Abu Maghsib was interrogated in another room. After the investigation was completed, they were informed that a complaint filed by Hamas against the TV office for the charge of "falsification and fabrication", based on the report, and that there is an order to detain them but they will be released provided they return at 8:00 AM the next day, Sunday, corresponding 26 August 2018. Separately, their colleague, the photographer, Mohammad Samir Salim Al-Agha, (29 years old), from Al-Satr Al-Gharbi, Khan Yunis, who works for Palestine TV, has received a phone call at around 9:00AM on

Saturday, corresponding 25 August, from a person who identified himself as an officer from the investigation department, and asked him to come to the headquarters of the investigation services in the town of Bani Suhaila east of Khan Yunis. Indeed, he actually went there and arrived at the headquarters at around 1:00 PM, where he saw the television director, Rafat Al-Qudra, and one of the police officers told him that he was not wanted. Accordingly, he left the headquarters about 10 minutes after his arrival without being subjected to any interrogation. On Sunday, corresponding 26 August 2018, upon the request of the investigation department the previous day, the staff consisting of Rafat Al-Qudra, Yousuf Abu Maghsib and Mu’min Al-Shubaki, have returned to the police station east of Khan Yunis at approximately 8:00 AM, where their statements were registered again by the police investigators not the investigation department. After about three hours, they released them after they were told that their file will be transferred to the Public Prosecution, and that they have to go there for follow up purposes at 10:00AM on Tuesday, corresponding 28 August 2018 and that they will be released on bail. On Tuesday, the three journalists arrived at Khan Yunis Prosecution Office at around 9:30AM, accompanied by the legal advisor of the TV office, Hazim Abu Sha’ban. The statements of the entire staff were taken individually by the prosecutor. However, the TV Director, Rafat Al-Qudra, and the prosecutor in Khan Yunis, Ibrahim Al-Dabbari got into a verbal altercation, in the presence of the

lawyer of MADA Center in Gaza Strip, Ihsan Abu Shrahk, due to the prosecutor’s loud voice when he asked the journalist Al-Qudra, why they did not get a prior authorization for filming, and that the filmed material about the kid Abu Anza must be presented to the regulatory authorities before televised. The prosecutor decided to question Al-Qudra after the altercation, after he asked all the staff to leave, including the lawyer of MADA Center and the legal advisor of the TV Office who were following up with this case. He remained alone in the office of the prosecutor, and 20 minutes later, the TV legal advisor was allowed to enter the room. At approximately 11:00AM, the TV director signed his testimony at the end of the interrogation, as did his colleagues, Yousef Abu Maghsib and Mu’min Al-Shubaki. At around 12:00PM they all left, after the prosecutor told them to come back on Sunday, corresponding 2nd September 2018 to meet the chief prosecutor, who wanted to “know them and drink a cup of coffee with them”. Al-Qudra replied this has taken a very long time and it may cause media escalation.

The lawyer of MADA Center, Ihsan Abu Sharakh, has attended the interrogation sessions twice, one at Khan Yunis Eastern Police Station on Sunday, corresponding 26 August 2018, and the second in the Khan Yunis Public Prosecution Office on Tuesday, corresponding 28 August 2018. He considered what happened to Palestine TV Staff for reporting on the child who was attacked in Absan, Khan Yunis, on 22 August 2018, has no legal basis, and that it falls under the scope of political rivalries due to internal division, intimidation of journalists, and restricting their

journalistic work. He said that it was a legal violation when the lawyers of MADA Center were prevented from attending the interrogation session in Khan Younis Prosecution Office on Tuesday, corresponding 28 August 2018, not to mention allowing him and the legal advisor, to enter the prosecutor's office only few minutes later, given that in the room, there was the Director of Palestine TV in Gaza Strip, Rafat Al-Qudra, without again allowing MADA's lawyer to enter, despite his right to do so, even if there is more than one lawyer with him (the accused).

(27th August) Mefuot Arkhu Settlement is located to the northwest of Jericho, where the Israeli occupation forces have established a military outpost in which the soldiers are constantly present to protect the neighboring settlements. One settler, called Aumar, has seized more than 500 dunums of Palestinian land and planted them with palms, pomegranates and olives. This settler spread a state of terror in the area, and he was shooting the shepherds to intimidate them, he even killed a number of the sheep owned by Bedouin families living in the area.

According to the investigations conducted by MADA field researcher, Palestine TV staff, consisting of: the journalist, Ahmad Abdelmalek Ibrahim Sjawer, the journalist

Mohammad Mahmoud Hassan Enaya, the journalist Omar Ahmad Abu Awad, the journalist Watan Bassam Balas, and the drivers, Samer Asad Abu Salman and Ayman Mohammad Harash, went on Monday, corresponding 27 August 2018, to the Bedouin gathering of the Zayed family northwest of Jericho, to film a new episode of "Not a neighbor" show. After they completed filming the episode, an Israeli military patrol consisting of three soldiers and an officer called Sophie, have detained the staff and seized their cell phones, deleted all the filmed materials from their cameras and took the keys of their vehicles belonging to the Palestinian Broadcasting Corporation. This detention lasted for more than two hours and took place in Al Mu'Rajat Street, before the Israeli officer called another military force including four female soldiers. They handcuffed and blindfolded all of the TV staff and took them in a military jeep to the military outpost located near the Bedouin gathering. It should be noted that this is the closest military outpost to the region, and their transfer to the mentioned outpost did not take time but few minutes according to the staff members. At around 02:30PM, the TV staff members were handed over to the Israeli camp blindfolded. One of the soldiers told them that "it is now 02:30 and you will be released within an hour". Then journalist Omar Abu Awad asked the rest of his colleagues whether they were all there with him in the place, and everyone answered yes. At that exact moment, a female soldier asked him to be quiet, and Abu Awad answered that he will not be quiet until he makes sure that his colleagues in the staff are all fine. She

grabbed him by his hand and asked him to get up, and he did. She took him away from his colleagues and put him under the sun, and said "you can sit here and talk all you want". Abu Awad did not know how long he remained under the burning sunlight, but he said, "When I felt a pain in the head, I spoke and said that my head hurts me. One of the soldiers replied that he was a paramedic and said to me: "Drink some water", and when he drank some water he felt a severe headache and lay down on the ground. When the soldiers saw him lying on the ground, a female soldier came and said to him: "Hey! Good Morning, the punishment is over, come on! Get up". She took him to his colleagues and sat with him, he asked again "Who's here?", his colleague Ayman Harsh answered "I'm here Omar, and we are all here fine", Abu Awad replied that he was tired and wanted some water. One of the soldiers brought water and chocolate sandwiches to all the staff except for Abu Awad because he was unable to eat anything due to the severe pain he felt in his head. At around 7:12 PM (the staff members heard the Maghreb prayers" and they were still in detention. Abu Awad then lost his ability to move or talk due to the fatigue and exhaustion he felt. At that moment, Ayman Harsh said to the occupation soldier "What did you do to him? take off my blindfold, I want to see Omar". An argument was heated between Harsh and the soldiers. The soldiers released the entire staff except for Abu Awad, who was mentally conscious but unable to move and talk. A brown-skinned female soldier removed the blindfold from his eyes as well as the handcuffs. He was unable to move, talk, or even see well even though

he was fully aware of what was happening around him. The Israeli soldiers put a needle in his left hand to enter the fluids to his body and provide him with the first aid. One of the soldiers addressed him saying “Do you want us to take you to your home to see your children? Come on! Wake up! Because we cannot take like this”. He continued talking to him, but Abu Awad could not stand up or talk. The soldiers took him by ambulance from the camp to the main street, which is about 700 meters away. His colleagues were waiting for him. A Palestinian Red Crescent ambulance was in the area, but the soldiers refused to hand over Abu Awad to the Palestinian medical staff, and asked them to wait until the Israeli medical staff comes and check his condition. However, the Palestinian official paramedic refused to wait since Abu Awad’s condition was serious and the oxygen content in his body did not exceed 60% which is why he had to be transferred to the hospital as soon as possible, according to the paramedic, Ahmed Al-Alami, of the Palestinian Red Crescent Society. Abu Awad was taken to Jericho Governmental Hospital and he remained in a complete coma for two days according to medical reports. He received the initial treatment at Jericho Governmental Hospital on the first day without any signs of improvement. On the following day, he was transferred to Istishari Awab Hospital in Ramallah, and according to the medical reports, Abu Awad was suffering from lack of vision, severe mineral deficiency, a severe sunstroke and severe dryness as a result of being detained under the direct sunlight.

After six hours of detention, the photographer, Bahaa Nasr, was released. Later, he stated to MADA researcher that he was subject to torture and humiliation by the occupation soldiers while he was detained under the sunlight for more than two hours. He stated "I remained under the sun for more than two hours before they took me in the jeep, I remained for fifteen minutes lying on the ground on my stomach, then they searched me and took me in the jeep. They hit my head inside the vehicle and took me with two other detainees (from the demonstrators). This is in addition to the profanity and threatening with imprisonment". At about 1:00PM, some officers arrived and had a discussion with the soldiers and decided to arrest him. He was taken with his cameras and his stuff. They forced him to enter the jeep and sit in a very difficult position with his head down. He was forced to close

his eyes so he did not know where he was. Halfway, while he was being transferred as a detainee, he began screaming from the severe pain he felt in his foot due to sitting in a difficult position. One of the soldiers slapped him on the face and asked him to be quiet. He was taken to Benjamin Investigation Center and when he was removed from the military jeep, they pulled his feet, but he did not feel them as a result of the severe pain, while the soldiers were laughing and cursing. Then his handcuffs were changed and he was taken to the hall of the investigation center accompanied by two soldiers, where he stayed for about an hour and a half, until a police officer asked him, "Why did you hit the soldiers". He then asked him what had happened to him. Nasr told him that while he was filming he informed the officer that he was a journalist and would leave the place but the officer in the army got angry and attacked him with a number of soldiers. About an hour later, the same officer (investigator) returned and asked him the same question. Nasr told him that he was filming a video, and that he could see if anything of what the soldiers have claimed was true. They informed him that he will be handed over to the DCO. Then another officer came, took some information from his personal card, and registered the same on a laptop that he had. After about six hours of detention, the soldiers transferred the journalist Nasr from "Benjamin" investigation center to the settlement of "Beit El" located in Al-Bireh - specifically to the liaison department where he was handed over to the Palestinian liaison department.
